Signing in to Google

Control your password and account access, along with backup options if you get locked out of your account.

Make sure you choose a strong password
A strong password contains a mix of numbers, letters, and symbols. It is hard to guess, does not resemble a real word, and is only used for this account.

Password & sign-in method

Your password protects your account. You can also add a second layer of protection with 2-Step Verification, which sends a single-use code to your phone for you to enter when you sign in. So even if somebody manages to steal your password, it is not enough to get into your account.

Note: To change these settings, you will need to confirm your password.

Password Last changed: May 2, 12:45 PM >

2-Step Verification On since: May 20, 12:15 AM **Enable it** >

Account recovery options

App passwords

App passwords allow 2-Step Verification users to access their Google Accounts through apps such as Mail on an iPhone or Mac, or Outlook. We'll generate the app passwords for you, and you won't need to remember them. [Learn more](#)

Name	Created	Last used	Access
nvr	May 22	May 26	REVOKE
Foxmail	May 20	May 20	REVOKE
nvr2	May 26	-	REVOKE
